

**City of Cupertino - Civic Center Master Plan
Additional Responses to Public Comments**

Library Expansion

Comment: Include more seating areas for library users; include a computer lab.

Response: The current scope of the expansion of the Library is to provide a program space for Library events and functions. These suggested elements are not in the scope for the current proposed expansion. The suggestions are noted and will be provided to Council and Library operations.

Master Plan Implementation

Comment: Is there a fiscal analysis or financial plan to pay for implementation of the master plan?

Response: A financing strategy is included in the master plan with additional analysis included in the master plan appendix. Should the master plan be approved Council with direction to begin implementation, additional financing analysis should be performed.

Regnart Creek Interface

Comment: A five-foot flood protection/maintenance easement along the eastern boundary of city property, adjacent to Regnart Creek, must be kept clear; plans must show the easement; and, a Santa Clara Valley Water District permit is required for work within the right-of-way.

Response: The five-foot easement will be kept clear; construction plans will illustrate the easement, and the City will obtain all necessary permits.
