Via-Cupertino Progress Update

The City's local on-demand shuttle, Via-Cupertino, has been busily transporting residents, visitors, employees, and students since its launch on October 29, 2019. Via-Cupertino has made **6,970** overall trips in less than three months of service! Ridership has increased steadily and hit a record just before the holidays, with 219 trips made in one day on December 19. As anticipated, ridership slowed during the holidays and has been building back since the New Year.

Ridership Trends

The Via-Cupertino data dashboard has shown that the Sunnyvale Caltrain station remains the most popular drop-off location, while the area near Monta Vista High School is the most popular pick-up location. The heat maps also indicate high use near both Apple campuses, as well as Main Street Cupertino and businesses within the "Heart of the City." Via will present a detailed quarterly report to staff on January 29, 2020. That report will be uploaded to the shuttle webpage at www.cupertino.org/shuttle.

Public Works and Senior Center staff have helped enroll 223 individuals for senior discounts, student discounts, disabled discounts, and low-income discounts. The 50% discount will be helpful when the \$1 introductory fare expires on February 1, 2020. Those with discounts will enjoy fares of \$1.75 while others will pay \$3.50 per trip. Weekly and four-week passes are available for \$17 and \$60 and allow for four trips per day. Staff will be monitoring ridership data as fares increase in a phased approach, working towards the \$5 fare Council approved at the beginning of the program. Coupon codes and other incentives will continue to be offered after the fare transitions to \$3.50 to continue to attract new riders to the service.

Funding Update

The City has been officially notified by the Bay Area Air Quality Management District that it will be awarded \$423,000 to support Via-Cupertino! Another grant opportunity will open for applications in spring 2020 via the 2016 Measure B VTA program called "Innovative Transit solutions." Staff will pursue all potential grant funds for the project, including grants intended to potentially expand the fleet with electronic vehicles (EVs).

Cupertino Sports Center Celebrated its 30th Anniversary

On January 11, 2020, the Cupertino Sports Center celebrated its 30th anniversary with the first 300 guests receiving a free T-shirt and cinch bag. Attendees were treated to free activities all morning including fitness classes, badminton, table tennis, pickleball, basketball, archery, and chess games. Lifetime Activities oversaw the outdoor sports activities and had staff inform guests about their class and camp offerings. In addition, the Cupertino Tennis Club promoted their USTA leagues and Jim Colvin, our newest personal trainer, spent the morning talking to members about fitness programs. The event ended with all guests receiving a special Sports Center anniversary cookie and a raffle that offered free memberships, weekly camp vouchers,

and ball machine services. For information on the Sports Center, including memberships and programs, visit www.cupertino.org/sportscenter.

Safe Routes to School Street Light Banners

The City's Safe Routes to School team partnered with talented local high school students to design new street light banners for the City of Cupertino. These new banners are intended to inspire, encourage, and promote bicycling and walking throughout the City. Banners have been placed on street lights along De Anza Boulevard, Stevens Creek Boulevard, Stelling Road, and Torre Avenue.

First Environmental Recycling Day and Shred It Event of 2020

The first "Environmental Recycling Day and Shred It Event" of 2020 was held on Saturday, January 18 at De Anza College. This quarterly event is sponsored by Recology, the City's waste hauler, to offer Cupertino residents a no-charge opportunity to shred confidential documents and drop off other unwanted materials for responsible reuse and recycling. Common items received include gently used clothing, plastic toys and play structures, yard trimmings, kitchen appliances, universal waste (batteries, CFLs, and fluorescent tubes), construction and demolition debris, and electronic waste. 446 residents participated in this popular event and found purposeful reuse opportunities for many items no longer needed in their homes.

In addition, Recology received the following items:

- 7,400 pounds of shredding material
- 2.13 tons of construction and demolition debris
- 350 pounds of yard waste/cardboard
- 2,645 pounds of e-waste
- One large flatbed full of donatable materials and appliances

The next events will be held on April 18, August 15, and November 14.

Infrastructure Division Completes Disaster Recovery Project in Phoenix Location

The Infrastructure Division has completed the installation and successful test of our City's Disaster Recovery (DR) Environment housed in Phoenix, Arizona. The City now has a duplicate copy of its Server and Storage Environment housed within a highly secure Tier 3 data center. A Tier 3 data center has multiple paths for power and cooling, and systems in place to update and maintain it without taking it offline. It has an expected uptime of 99.982% (1.6 hours of downtime annually). With natural (earthquake) and person-made (cyberattack) disasters, it is paramount to have such a DR environment in place. The project has an annual cost of \$28,680 (space within data center = \$9,480; Fiber Ethernet path = \$8,808; Backup data circuit (if Ethernet fails) at Phoenix = \$10,392).

The project included five main phases:

- Phase 1: Build two identical, yet separate network/compute/storage infrastructures (Cluster 1 & Cluster 2)
- Phase 2: Acquisition of a low latency ethernet fiber path between Cupertino and Phoenix, AZ so that Cluster 1 could communicate with Cluster 2
- Phase 3: Install and configure the necessary disaster recovery software and processes to ensure a successful fail-over from Cluster 1 to Cluster 2 (Fun fact: The latency between Cluster 1 and Cluster 2 is 23 ms, and the distance between Clusters approximately 1000 miles.)
- Phase 4: Install Cluster 2 at the Phoenix data center (Cluster 1 remains in Cupertino)
- Phase 5: Test, test, test

During December, the Infrastructure Team traveled to Phoenix to perform Phase 4 and Phase 5. To ensure limited disruption to staff, the final install and testing occurred over the December holiday. Congrats to this team for a job well done!

Cupertino Municipal Code on Waste Containers

The City of Cupertino has an ordinance that regulates how long trash and recycle containers can be stored at an “authorized collection station.” An authorized collection station, for example, would be the front curb in front of a home for a resident. Cupertino Municipal Code (CMC) Chapter 6.24 regulates the compliance of the requirements. CMC Section 6.24.070(D) specifies that containers shall be placed at the authorized collection station not more than 24 hours preceding the scheduled collection time and containers must be removed within 24 hours after collection.

6.24.070 Garbage, Organic Waste and Non-Organic Recyclables Containers.

D. Garbage containers, organic materials containers and non-organic recycling containers shall be placed at the authorized collection station not more than twenty-four hours before the scheduled collection time, unless the resident subscribes for ‘Walk-Up’ services. All containers shall be removed from the collection station area within twenty-four hours after collection. Where containers are placed within a designated bike lane, containers shall be removed within twelve hours after collection. All bins, boxes, and containers of one

cubic yard or more, which are serviced by the solid waste collector, shall be identified with the name and telephone number of the collector servicing the bins, boxes and containers.

Further, CMC Section 6.24.030(A) requires the owner of each occupied residential or nonresidential premises shall subscribe to and pay for a level of service sufficient to provide for the collection of all solid waste generated on the property.

6.24.030 Mandatory Solid Waste Collection Service – Owner Responsibility.

A. The owner of each occupied residential or nonresidential premises shall subscribe to and pay for at least the minimum level of garbage collection service made available to that premises by the solid waste collector, as specified in the franchise agreement between the city and the solid waste collector executed pursuant to Section 6.24.120 of this Chapter or obtain an exemption under Section 6.24.031 below. The owner of each occupied residential or nonresidential premises shall subscribe to and pay for a level of service sufficient to provide for the collection of all solid waste generated on the property. Customers at non-residential properties must subscribe to services on a regular weekly basis sufficient to prevent container or bin overages and, where necessary, to extra services to prevent overages. Nonresidential customers' solid waste, if bagged, shall be in clear plastic bags.

The City encourages the community not to store trash/recycle containers at the authorized collection station and to also subscribe to a level of trash service that is adequate for the property.

Temporary Bulb-outs to be Installed on Portal Drive and Merritt Drive

Temporary bulb-outs will be installed at the intersections of Portal Avenue/Amherst Drive and Merritt Drive/Vista Drive in the next couple of weeks as part of the next phase of Bike Boulevard treatments along the Portal Avenue and Merritt Drive. The gray plastic and reflectorized posts are intended to narrow the roadway. This will have the combined beneficial effect of reducing vehicle speeds and shortening pedestrian crossing distances while still leaving sufficient room for bicyclists to safely transition through.

Later this year, the temporary bulb-outs will be replaced with permanent concrete bulb-outs, as part of a larger construction package of permanent Bike Boulevard improvements around the City.

Clean Water and Storm Protection Fee Cost-Share Program Launches

On July 5, 2019, Cupertino property owners voted on and approved the 2019 Clean Water and Storm Protection Fee. The new fee appeared on Cupertino property tax bills as a Special Assessment titled "2019 CUPT STORM WATER" beginning in tax year 2019/2020. All revenues generated will be used to prevent litter and other pollutants from reaching local creeks and the Bay as well as provide for timely proactive maintenance of aging stormwater infrastructure.

In an effort to reduce the financial impact this fee may have on low-income property owners, the City Council approved a cost-share program to lower the annual fee by 20%. Qualifying low-

income property owners may apply for the cost-share program using an online form at Cupertino.org/watercostshare. Upon approval, the City will refund 20% of the Clean Water and Storm Protection Fee collected on 2019/2020 property tax bills.

To raise awareness about this program, staff has worked with PG&E to arrange for notices to go out in utility bills to participants in PG&E's CARE or FERA discount programs. On January 17, Cupertino staff also mailed out an informational flyer to 762 long-time owners. An article in the Cupertino Scene and the 50+ Scene will also be published to reach more potential qualifying owners.

For details about the program and application requirements, visit Cupertino.org/cleanwater or call the Environmental Programs Division at (408) 777-3236.

California Department of Housing and Community Development (HCD) SB 2 Planning Grants Program

The California Department of Housing and Community Development (HCD) announced that the City of Cupertino was awarded \$310,000 in grant funds under the HCD's SB 2 Planning Grants Program. The City will use the funds to improve the Permit Center to offer community access to government services utilizing advancing technologies. As part of the Permit Center improvements, staff is redesigning the customer experience through projects ranging from physical on-site enhancements, availability of online resources and services, permit software and programs, and updates to distributional handouts on development regulations. The SB2 Planning Grants funds will be used specifically to offset the digital program improvements and online access solutions.
