# City of Cupertino
CDP Cities 2018

This snapshot report presents the score that City of Cupertino received for its response to CDP's 2018 questionnaire. CDP uses the scoring methodology to incentivize cities to measure and manage environmental impacts. Responses are scored by CDP and CDP's scoring partner ADEC, using the 2018 CDP Cities Scoring Methodology. Scores are private to cities although CDP will recognize and reward the highest scoring cities.

Scoring

Score	Scoring band
D	Disclosure

Scoring measures progress towards environmental stewardship

Leadership A / A-
Management B / B-
Awareness C / C-
Disclosure D / D-

Regional Average Score

The bar chart above shows the count of scores achieved by cities in North America. The score for City of Cupertino is shown in red.

Global Average Score

The bar chart above shows the count of scores achieved by cities globally. The score for City of Cupertino is shown in red.

Scoring band explanation

A city in the Disclosure scoring band has made the first step in the journey of understanding and reducing climate impacts. These cities understand the value of collecting data to drive climate action but may not have structures or resources in place to obtain the necessary information.

	Adaptation	City-wide emissions	City-wide emissions reductions	Climate & social risk	Opportunities	Water supply
City of Cupertino	D	D	D	D	D	D
North America Average	D	D	D	C	C	D
Global Average	D	D	D	D	D	D

How to improve your city's score

Sections Questionnaire	Next steps Disclosure band
Introduction and governance	Consider addressing climate impacts within the city master plan. This action demonstrates a commitment to addressing and preparing for climate change.
Hazards and Adaptation	Conduct and/or disclose a risk assessment to include all climate hazards experienced in the city and how these expect to change in the future. Having a risk assessment is the first step in preparing for the impacts of climate change. Having a mayoral commitment to adapting to climate change demonstrates to potential funders the political commitment to reducing vulnerability for the citizens and businesses within the city.
Opportunities	Check with other departments in your authority to see if they're working on projects that involve partnership with the private sector, these may involve a relevant climate or sustainability dynamic. Relevant projects to disclose could include recent projects, studies or funding bids. Collaboration with the private sector can be invaluable in highlighting the potential co-benefits of addressing climate impacts.
City-wide Emissions	City-wide emissions inventories should be a priority for cities as a step towards measuring and managing GHG's across their boundary.
Energy and Emissions reduction	To find your city-wide energy mix breakdown, talk to a local or national utility provider for this data. Please provide a comment to indicate where you received the data from. Consider developing and/or reporting a city-wide climate change action plan. Emissions reductions targets should be a key component of this plan.
Water	By mapping the sources of your city's water supply, cities can consider assessing the key risks which are associated with it.
